

# SENIORS' HOUSING REPORT

## Ontario

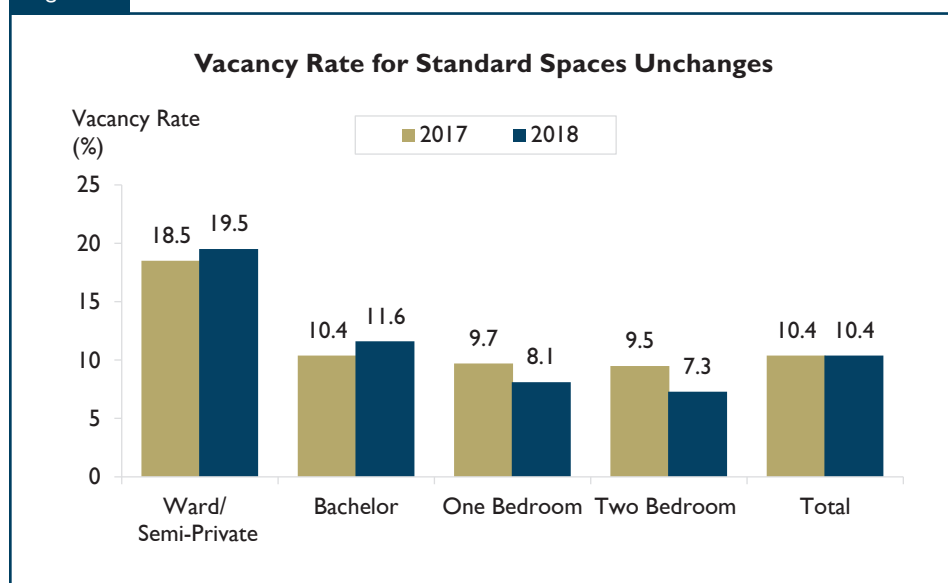

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: 2018

## Highlights

- The vacancy rate for standard spaces remained unchanged at 10.4%. The vacancy rate for total spaces dropped to a record low of 9.9% from 10.3% last year.
- Total supply grew by 3,500 spaces, the most since 2001.
- The average rent for a standard space increased by 2.6% to \$3,618.

### Seniors' Demographic Trends and Their Impacts on Seniors' Housing Demand

Men have seen their average life expectancy grow faster than women and as such, are accounting for a growing share of the population aged 75 years and over as well as 85 years and over in Ontario (Figure 2). During 2011-2016, men captured almost half, 49.7%, of the total increase in the population aged 75 years and over in Ontario, and 46.1% of the increase in the population aged 85 years and over.

This demographic trend reduced the likelihood of seniors living alone. According to census data, one-person households accounted for 45.8% of total households aged 75 years and over in 2016, down from 47.3% in 2011. Furthermore, the gains in life expectancy led to seniors delaying their entry into the residential care market thanks to their improved health.

Figure 2

Source: Statistics Canada, Table 051-0062 Estimates of Population by Census Division Ontario Ministry of Finance, Ontario Population Projections Update, 2016-2041

The growth in demand for seniors' housing has been driven by older seniors aged 85 years and over. From 2011 to 2016, this age group captured all the growth in demand for seniors' residences, excluding residences that only provide

extended health care services, such as long-term care homes (Table I). Also, men were less inclined to live in seniors' housing compared to women in Ontario, although the gaps have been closing!

\* Total residents living in facilities providing a mix of services of nursing home and residence for seniors in 2011 are estimated.

<sup>2</sup> Residences for seniors refer to residences that provide support services or assisted living services (meals, laundry, supervision of medication, assistance bathing or dressing, etc.), but no extended healthcare services. Residents are independent in most activities of daily living.

<sup>3</sup> Facilities that are a mix of both a nursing home and a residence for seniors refer to residences that provided extended health care services to some residents, but only support services or assisted living services to other residents.

## TABLES INCLUDED IN THE ONTARIO SENIORS' HOUSING REPORT

Standard Tables		Page
1.1	Vacancy Rate (%) of Standard Spaces by Unit Type	6

## Methodology

Canada Mortgage and Housing Corporation conducts the Seniors' Housing Survey in February and March. This annual survey became national in scope in 2009, covering all centres in each of the ten provinces. Both private and non-profit residences are included in the survey universe.

To be eligible for inclusion in the survey results, a residence must:

- ✓ have at least one unit that is not subsidized (in the Atlantic provinces, Quebec and Ontario);
- ✓ have been in operation for at least one year (for example, it must have started operation before January 2015 to be included in the 2016 survey);
- ✓ have at least 10 rental units (in Quebec, Ontario and the Prairies) or 5 rental units (in the Atlantic provinces and B.C.);
- ✓ offer an on-site meal plan;
- ✓ not mandate high levels of health care (defined as 1.5 hours or more of care per day) to all of its residents; nursing homes and long-term care homes are examples of residences that were not included in the survey;
- ✓ offer rental units; life lease units and owner-occupied units are excluded from this survey; and
- ✓ have at least 50 per cent of its residents who are 65 years of age or older.

The Seniors' Housing Survey is a census and not a sample survey; therefore, all seniors' residences in Canada meeting these criteria are to be part of this survey. The survey universe in Quebec may include private residences that do not meet the conditions for obtaining a certificate of compliance.

Survey data were obtained through a combination of telephone interviews and fax and e-mail responses. Information was obtained from the residence owner, manager or administrator. Survey results reflect market conditions at the time of the survey. Survey results have been weighted to adjust for non-responses, in order to ensure that they are reflective of the universe. The level of statistical reliability is noted in the data tables. For more information on the reliability of the data, please click [here](#).

All statistics published, excluding information on new market supply, include only those residences that have been in operation for at least one year.

## Definitions

**Space:** A space is a residential area that is rented out. Examples of spaces include one half of a semi-private unit, a private or bachelor unit, a one-bedroom unit and a two-bedroom unit. In most cases, a space is the same as a unit. The exception is the case where a unit has been divided to rent to multiple residents. Semi-private and ward units are an example of this. Unless otherwise indicated, data for spaces are for all unit types.

**Standard space:** A space where the resident does not receive high-level care (that is, the resident receives less than 1.5 hours of care per day) or is not required to pay an extra amount to receive high-level care. Regional terms for this type of space may vary across the country.

**Heavy care space:** A space where the resident is paying an extra amount to receive high-level care (1.5 hours or more of care per day). Examples of conditions that could require high-level care include Alzheimer's, dementia and reduced mobility.

**Respite space:** A space used to provide temporary accommodation for a senior who normally lives in another place and not at the residence.

**Non-market or subsidy space:** A space where the rent received for the unit is less than market rent or where the resident occupying the unit is subsidized.

**Rent:** The actual amount a resident pays per month for his or her accommodation space and all mandatory services. For vacant spaces, the rent is the amount the owner is asking for the space.

**Vacancy:** A space is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

**Capture rate:** The main age group living in seniors' residences are persons aged 75 years and older. Capture rate in a centre is the ratio of the total number of residents living in the survey universe divided by its estimated 75+ population, expressed as a percentage.

### Acknowledgement

The Seniors' Housing Survey could not have been conducted without the co-operation of the residence owners and their staff. CMHC acknowledges their time and assistance in providing accurate information. As a result of their contribution, CMHC is able to provide data and analysis that benefits the entire industry.

### Confidentiality

All information provide through this survey is kept strictly confidential and only used by CMHC to generate statistics and data sets that do not allow for the identification of individuals, households, businesses or buildings.

## CMHC HELPS CANADIANS MEET THEIR HOUSING NEEDS.

Canada Mortgage and Housing Corporation (CMHC) has been helping Canadians meet their housing needs for more than 70 years. As Canada's authority on housing, we contribute to the stability of the housing market and financial system, provide support for Canadians in housing need, and offer unbiased housing research and advice to Canadian governments, consumers and the housing industry. Prudent risk management, strong corporate governance and transparency are cornerstones of our operations.
